

30th June 2015

**NOTICE OF OBSOLESCENCE ON NIPPY 3 range of
HOMECARE VENTILATORS (Nippy 3, Junior, S and ST)**

The Nippy 3, S, ST and Junior ventilators were manufactured from 2003 until 2007. They have therefore been out of production for over 7 years. Unfortunately, we are finding it increasingly difficult to source parts for this product range and therefore are only able to offer reduced servicing, maintenance and support for these products.

We have therefore decided, with regret, to make the Nippy 3 ventilator range obsolete from 31st August 2015.

In the meantime, we will continue to provide parts, service kits and support for them.

Please note this does not include the 3+ range of ventilators (3+, S+, ST+ and Junior + which are still in production)

Yours sincerely,

Mr N. Davis
Technical Director,
B&D Electromedical Ltd
